Charles:

Our in-river work on the project is complete for this year, but starting in spring 2010 we will be working to complete the removal of bank materials from the Island 2 area and the southern bank of the river near Island 2. We hope to begin that work in late April or early May. The areas being addressed have not changed since the last time we communicated.

Steve,

Are you done with Island 2 at Plainwell Site 2? I would like to get in there early next year and see what can be salvaged or repaired of the mussel bed I worked on there. Hope you have a Happy Holiday. cjm

Greetings,

Due to very high flow levels [ cause unknown] we were only able to do the shallow part of the bed at the diversion dam. We hope to finish this site next Thursday or Friday. We will be meeting at MDNR Plainwell next Thursday between 8 and 8:30 am to organize. This site is easy access and people can come and go if they can only work a half day. Hope to see someone from MDNR and USFWS there. Fisheries; whoever is dropping trees on the west side of the river has not removed all of the trees they have dropped in the river. I do not believe this is Arcadis but someone else. Also the lower diversion dam is in real bad shape..  
Thanks, cjm
